Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Claims 1-9 disclose transaction function devices that become automatically interoperative with each other.
- II. Claims 10-11 disclose a sheet dispenser to dispense at least one sheet.
- III. Claims 12-24 disclose a second copy of the service proxy from the lookup service which is operative responsive to the user interface software component.
- IV. Claims 25-29 disclose invoking a method of service proxy through operation of the interface service responsive to an input.
- V. Claims 30-31 disclose a first and second processor and transaction device where the second transaction service affects the first prior to the financial transaction.
- VI. Claims 32-35 and 42-43 disclose sending a message to a lookup service, sending a message from the lookup service to a transaction service, invoking a transaction method of the service proxy, a data store, an application software drawn to store data in the data store.

- VII. Claims 36-41 disclose a processor operative to register with a service, the processor causes a copy of a service proxy to be delivered to a service, the service proxy causes a command to the processor.
- VIII. Claims 44-56 disclose a personal automated transaction machine where the processor is operative responsive to the first service proxy to cause the service to perform a transaction function responsive to the account information.
- IX. Claims 57-66 disclose an input device that corresponds to the user interface indicia, the account information and the transaction service proxy, to cause the host to perform at least one transaction function.
- X. Claims 67-76 disclose performing the selected transaction function through operation of the host responsive to the transaction service proxy and the account information.
- XI. Claim 77 discloses a portable personal automated transaction machine.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Currently, no claims are generic.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

3. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jamie H. Swartz whose telephone number is (571) 272-7363. The examiner can normally be reached on 8:00am-4:30pm Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on (571) 272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
